## **IMPORTANT!!! Wall level finish and wall box mounting position:**

Wall surface where the Switchhub will be Installed needs to be evenly flat. This is to ensure that the touch panel magnetic will 100% attach properly to the surface of the Switchhub.

# HUB PAIRING AND RESET

## Ethernet Hub Pairing and Reset

*Note: Make sure the Switchhub LAN wire is connected to the internet Wi-Fi router LAN port.  
Please refer to wire installation instructions.*

## INSTALL MOBILE APPLICATION and sign in

Please Download and install compatible Tuya APP from Google Play Store or Apple App Store.

## To Pair

### Step 1:

Detach the smart touch panel to access the hub reset button and led indicators.

### Step 2:

Ethernet Hub will automatically set to pairing mode when powered ON. Two green lights are ON when ready to pair.

### To pair it to the APP, open APP:

Add device -> Choose Gateway Control -> Gateway (Zigbee). Follow APP instructions. For manual pairing, press reset and hold for 5 secs until blue light is ON and red light is flashing.

## To Reset

To manually set pairing mode or to RESET press and hold reset button for 5 secs until two green lights are ON and ready to pair.
